

PFA 9111 Video conferencing loudspeaker

The PFA 9111 (RS232-485) loudspeaker is especially developed for video conferencing. The loudspeaker is equipped with patented technology which produces unparalleled, clear (vocal) sound reproduction. Because of this special filter technology the sound reaches much further into the room, even at low volumes, than conventional loudspeakers.

The PFA 9111 loudspeaker exactly matches the PFF 5100 video conferencing furniture.

PFA 9111 Video conferencing loudspeaker

In addition to the usual audio input, the built-in digital amplifier has a port for RS232-485 communication. This makes it possible to operate and control the loudspeaker remotely in larger installations.
